Performance Engineering

The 5280 BP from Heights forms part of a full range of solvent Processing equipment which also includes an ETL Exposure Frame, Light Finisher and 6 Drawer Dryer System.

All the units are built to strict quality guide lines and are simply the only option for the large format plate making company where reliability, performance and quality engineering is a must.

The units carry with them accreditation for safety standards around the world and can be configured to suit the local power supplies.

Every unit is optimized for its performance and can be used with all types of solvent wash flexo plates and solvents, this makes the range ideal for the plate room using a variety of plate materials and thicknesses.
